

MUHAMMAD KHALISH REEZA BIN DZULKHALIF

SOFTWARE ENGINEERING STUDENT

Kuching, Sarawak | 97594@siswa.unimas.my | test

ABOUT ME

I am a third-year Software Engineering student eager to apply and expand my skills in OOP, databases, and web development. I am passionate about learning, improving my technical proficiency, and contributing effectively in team environments, with experience in team management, coordination, and project direction.

WORK EXPERIENCE

Audio Engineer at Petronas Youth Football Tournament, Kuching

2024

- Managed PA system setup and ensured smooth audio operation during the event.
- Collaborated with event organizers and technical team to resolve audio issues promptly.
- Demonstrated reliability and adaptability in a high-pressure environment.

ACADEMIC PROJECTS

Insurance Management System

Developed a console-based python program insurance management system

- Applied Object Oriented Programming Principles (Abstraction, Encapsulation, Inheritance and Polymorphism)
- Collaboratively designed the database schema to manage policies, clients, and claims effectively.
- Implemented core system functions for data entry, retrieval, and record management.

Online Lost and Found System (Software Requirement Specification Study)

Documented a SRS report on an Online Lost and Found System

- Collected and analyzed user requirements to define system functions and features.
- Designed system architecture, use cases, and data flow for the online lost and found platform.
- Documented all functional and non-functional requirements in the SRS report.

Sustainabite Application Prototype

Collaboratively designed and developed a healthcare application prototype using Figma.

- Created interactive wireframes and user interface layouts for key features and workflows.
- Focused on user-friendly design and smooth navigation to enhance the overall user experience.

Mental Health Awareness Application

Developed a Java GUI application focused on promoting mental health awareness.

- Designed interactive interfaces to provide information, resources, and self-assessment tools.
- Implemented event-driven features to enhance user engagement and accessibility.

EXTRACURRICULAR INVOLVEMENT

Organizing Committee for SAFE Initiative Program by AIESEC In Kuching and CelcomDigi

Head of Logistics

- Plan and coordinate movement routes, schedules, and delivery locations to ensure efficient operations.
- Oversee inventory management, including tracking, storage, and stock control.
- Manage transportation logistics, ensuring timely and cost-effective delivery of goods.

Volunteer for Asasi Back 2 Community Programme at Kampung Meranek

- Participated in organizing and executing a community cleaning initiative to improve local public spaces.
- Collaborated with other volunteers to collect waste, maintain cleanliness, and promote environmental awareness.

VIBES Initiative Challenge Pitching Competition

Team Steps-by-Steps!

- Conceptualized an educational to-do list app to help neurodivergent students prioritize tasks effectively.
- Developed the idea and prepared a compelling pitch presentation for the competition.
- Collaborated with team members to refine the concept based on feedback and brainstorming.

AIESEC In Kuching Executive

May 2025 - Oct 2025

Executive Member and Director of outgoing Global Volunteer

- Designed and created visually appealing posters and digital marketing materials to promote AIESEC initiatives.
- Provided support and customer service to volunteers participating in overseas programs, ensuring a smooth and positive experience.
- Collaborated with cross-functional teams to promote volunteering opportunities and organize impactful volunteering programs.
